✂ Skills

Web Services

REST, OpenAPI (Swagger), OAuth 2.0, JSON Schema, HTTP/1.1, HTTP/2, WebSockets, SOAP, WSDL, XML, GraphQL, RAML

Network Architecture

Mobile Networks (3G, UMTS, LTE), IT Networks, TCP/IP, OSI, AWS, Azure

Web Development

HTML5, CSS, JavaScript, jQuery, Knockout.js, Svelte, AngularJS, Bootstrap, Foundation, Gulp, Grunt, Apache, Nginx, Tomcat

Software Languages

Tcl/Tk, JavaScript, Node.js (Express), C, Python, Java, shell

Software Development

Git, GitHub, Bitbucket, CVS, SVN, Jenkins, Travis CI, SonarQube, Kubernetes, Docker, Agile, Alexa

Datastores

PostgreSQL, SQLite, MySQL, Oracle, MongoDB, DynamoDB, Redis, Memcached

📜 Certifications

AWS Certified Solutions Architect - Associate

Certificate badge AWS01128751

📁 Experience

Principal System Engineer, AT&T/TechMahindra

June 2015 - Present

- Envisioned, evangelized, architected, developed, and productized an internal web application that reduces costs and speeds up delivery by at least 50%. Consisted of multiple microservices deployed to an internal cloud service (based on Kubernetes).
- Established best practices for REST web services across all of AT&T as a member of the internal standards team.
- Oversaw and improved API design, security, and privacy for externally exposed APIs (over a hundred unique APIs) as a member of the API governance.
- Advanced the adoption of OpenAPI (Swagger) across the company by developing tools and educating internal teams on the benefits of using OpenAPI.
- Consulted and mentored internal teams weekly on API design to optimize the solution based on project goals and existing network architecture.
- Accelerated REST adoption by authoring internal best practice articles on REST concepts/design and collaborating on a company-wide REST training program.

Solution Architect, Sentaca

June 2011 - May 2015

- Achieved high customer satisfaction by ensuring optimal API solutions by collaborating with customers and internal architecture teams.
- Promoted API solutions at conferences and hack-a-thons by educating and demonstrating to customers the solution's capabilities.
- Deployed and tested API solutions requiring high availability, scalability, and low latency into cloud services (AT&T cloud and Amazon AWS).
- Implemented a new API documentation system which reduced delivery time by 30%.

Senior Test Engineer, AT&T

October 2010 - June 2011

- Headed the performance testing efforts for the messaging platform, including authoring test cases, test case execution, and managing defects.
- Mentored team members on mobile and IT networks, by holding periodic workshops and consulting on various projects.
- Developed software tools for automation, testing, and troubleshooting of APIs.

Senior Engineer, T-Mobile

May 2010 - October 2010

- Designed, engineered, and supervised subscriber-based mobile network elements.
- Successfully lead the engineering team on a complex (total replacement) subscriber migration across the entire network.
- Developed tools to streamline the implementation and troubleshooting of services.

Technical Sales Engineer, Alcatel-Lucent

August 2008 - September 2009

- Achieved highest-ranked sales engineer status by assisting the sales team to secure a major strategic win.
- Supported the sales team with technical expertise for product presentations and consultations to the customer up to the VP level.

Education

BS Mathematics & Electrical Engineering (Honors)

University of Toledo

Nanodegree Front End Web Developer

Udacity

Publications

Asterisk Open-Source PBX System

Linux Journal – February 2004

Languages

Experience (cont)

- ▶ **Senior Network Systems Engineer, Alcatel-Lucent** *Nov 2005 - Aug 2008*
 - Headed the performance optimization customer team from an engineering and project management role, and improved network performance by 10%.
 - Accelerated customer's understanding of the products by providing presentations and weekly performance updates to the customer up to the VP level, on the core network (GSM, UMTS).
 - Reduced turnaround time and increased effectiveness of statistics reporting by developing an internal web-based reporting tool (ETL, server, and client-side).
 - Collaborated with development and system engineering on performance issues to improve the product's performance.
- ▶ **Implementation Engineer, HMS Software** *Jan 2005 – Nov 2005*
 - Translated requirements from the customer into customized code that implemented new features into our standard software product (manufacturing ERP).
 - Performed testing, managed all bug fixes, and collaborated with the customer on the integration of the solution.
 - Increased productivity by mentoring other engineers in the Tcl programming language.
 - Optimized legacy code by conforming code to new features.
- ▶ **Senior Engineer, AT&T Wireless** *April 2003 – December 2004*
 - Engineered messaging platforms (e.g. SMSCs) within the company's mobile network.
 - Worked with the vendor to find the optimal solution and verification of the solution.
 - Reduced response time and improved quality by developing several software tools.
- ▶ **Lead Network Engineer, PacketVideo** *June 2000 – April 2002*
 - Designed, tested, and integrated the server (Linux) platform installation for both domestic and internal integrations.
 - Lead the first complete integration effort of the product line into the customer's network (JSP and servlets on Apache/Tomcat).
 - Significantly reduced cycle time and improved quality by developing a customized RedHat Linux Kickstart installation for field installations and sales demos.
 - Improved internal communication by developing a web application for installation activities, knowledge base, and configuration generation.
 - Provided pre and post-sales support, including presentations for the customers globally.
- ▶ **Lead Systems Engineer, Motorola** *October 1996 – June 2000*
 - Designed, tested and integrated products into the customer's mobile network, for both domestic and international customers.
 - Lead several major network changeouts for the engineering team.
 - Enhanced subscriber accessibility by developing procedures and software tools to migrate/modify subscribers efficiently and in a significantly reduced time frame.
